

Vortex Water Pump

This vortex pump is designed for transferring clean water and other liquids with similar properties. The pump features a compact design, high efficiency, and reliable performance.

Product Overview

QB series vortex pump features and model performance overview.

Vortex Water Pump Series

The QB series vortex pumps are designed for efficient transfer of clean water in residential and light commercial settings. Constructed with a durable cast iron body and copper impeller, these pumps offer a compact, lightweight, and portable solution for various fluid transfer needs. They are ideal for applications such as household water supply, tap water compression, and garden irrigation.

Technical Specifications

Performance Metrics

0.75 kW Max Power	60 m Max Head	42 L/min Max Flow
-----------------------------	-------------------------	-----------------------------

Model Specifications

Model	Power (kW)	Max Flow (L/min)	Max Head (m)
QB60	0.37	35	33
QB70	0.55	42	48
QB80	0.75	42	60

Features

Key Features Cast iron body, Aluminum-cast chassis, Copper impeller, Compact design, Optional thermal protection

Operational Details

Connection Size	1 inch x 1 inch
Power Supply	220V/50Hz
