

WA36R Abrasive Grinding Wheel 42mm

Abrasive grinding wheel designed for industrial cutting and grinding applications. It is constructed with WA36R grit for efficient material removal and long-lasting performance.

Overview

High-Performance Grinding Solution

This 42mm abrasive grinding wheel is engineered for high-performance industrial cutting and grinding tasks. Featuring WA36R grit, it provides efficient material removal while ensuring a long service life across various applications. The reinforced resin bond enhances durability, making it a reliable choice for processing diverse metals and alloys.

Technical Specifications

Performance Metrics

80 m/s

Max Speed

Grit Specification	WA36R
Wheel Diameter	42 mm
Maximum Operating Speed	80 m/s
Bonding Material	Reinforced resin bond
Model Code	42WA36R8BF

Applications

Usage Types

- Industrial cutting
- Grinding applications
- Material removal

Compatible Materials	Metals, Alloys
----------------------	----------------
