

Wafer Type Duo Check Valve

This is a wafer type duo check valve. It comes in sizes ranging from 50-600.

Product Overview

Wafer Type Duo Check Valve

This wafer-type duo check valve is engineered for industrial fluid control, adhering to rigorous design standards including API 594 and ASME B 16.34. It features a compact wafer design, making it suitable for space-constrained piping systems. With a versatile range of material combinations and support for multiple flange standards, this valve provides reliable backflow prevention in demanding operational environments.

Technical Standards

Flange Standards

JIS B 2210 (5K, 10K, 16K, 20K) • ANSI B 16.5 (150LBS, 300LBS)

Design & Face-to-Face

API 594, ASME B 16.34, ASME B 16.10

Materials

Construction Materials

Component	Material Options
Body	Stainless Steel, Cast Steel, Cast Bronze
Disc	Stainless Steel, AL-Bronze, Cast Bronze
Seat	NBR

Performance

Test Pressure (Kgf/cm²)

1.5 Kgf/cm²
10K/150LBS Body

1.1 Kgf/cm²
10K/150LBS Seat

2.1 Kgf/cm²
20K/300LBS Body

1.54 Kgf/cm²
20K/300LBS Seat
