

# Walk-Behind Concrete Saw

This walk-behind concrete saw is designed for cutting concrete and asphalt pavements. It has adjustable cutting depth and a water cooling system to reduce dust and extend blade life.

## Overview

Designed for easy maneuverability and efficient operation on hard surfaces like concrete and asphalt.

## High-Performance Walk-Behind Concrete Saw

This robust walk-behind concrete saw is engineered for precision cutting across concrete, asphalt, and marble surfaces. Featuring a high-capacity water tank for dust suppression and an adjustable cutting mechanism, it ensures efficient operation and extended blade life. Its durable frame design and intuitive controls are built to reduce operator fatigue, making it an ideal choice for road construction, maintenance, and various demolition applications.

## Technical Specifications

Engineered with a robust frame and precision cutting mechanism for road construction and maintenance.

<b>Power Source</b>	Diesel engine
<b>Power Output</b>	S185.8PS
<b>Rotary Speed</b>	2200 r/min
<b>Blade Diameter Range</b>	50-500mm

## Dimensions & Weight

Dimensions (L x W x H)	1500 x 550 x 900 mm
Weight	235 kg

## Key Features

Equipped with an integrated water cooling system to minimize dust and extend blade life.

### Performance Highlights

- High-speed precision cutting performance
- Large capacity anti-rust water tank
- Integrated water cooling system for blade longevity
- Stepless speed adjustment for depth control
- Robust frame design for stability
