

Walk-Behind Gasoline Cultivator

This walk-behind cultivator is powered by a gasoline engine. It features adjustable handlebars, a headlight, and a depth stake for varying tilling depth.

Product Overview

Professional Walk-Behind Cultivator

This robust walk-behind gasoline cultivator is designed for efficient soil preparation and tilling in agricultural environments. Powered by a reliable four-stroke gasoline engine, it features a durable red protective housing for the tines and adjustable handlebars for operator comfort. Equipped with a front mobility wheel and a depth-control stake, it offers precise operation and maneuverability, even in low-light conditions thanks to the integrated headlight.
