

# Walk-Behind Gasoline Tiller

This walk-behind tiller is designed for tilling soil in gardens and small farms. It features a gasoline engine and rotating tines to break up and aerate the soil.

## Overview

### High-Performance Soil Cultivation

This professional-grade walk-behind gasoline tiller is engineered for efficient soil preparation in gardens and small-scale agricultural settings. Featuring a robust four-stroke engine and durable metal construction, it offers reliable performance for breaking up, aerating, and tilling soil. Adjustable handlebars ensure operator comfort and maneuverability, making it an essential tool for preparing planting beds effectively.

## Technical Specifications

Engine Type	Gasoline (Four-stroke)
Frame Material	Reinforced Metal

## Key Features

### Operator Features

- Adjustable handlebars
- Walk-behind design
- High-torque rotating tines

Ideal Applications	Soil Aeration, Garden Tilling, Small Farm Cultivation, Seedbed Preparation
