

Walk-Behind Soil Cultivator

This agricultural machinery is designed for efficient soil cultivation and tilling. Featuring a robust construction with rotary blades, it is equipped with a single-wheel design and a long handle for operator control.

Overview

Efficient Soil Cultivation

This walk-behind soil cultivator is specifically engineered for effective soil preparation and tilling tasks. Featuring a robust construction with a single-wheel design, it offers excellent maneuverability for small to medium-sized farms and gardens. The integrated rotary blades ensure consistent soil aeration and breakdown, making it a reliable tool for agricultural maintenance.

Design & Build

Color Scheme

Red body • Blue support components

Design Configuration

Walk-behind, single-wheel

Construction Features

Robust construction, Rotary blades, Long handle control

Application

Suitable Environments

- Small farms
- Medium-sized farms
- Gardens
