

Walk-Behind Soil Tiller

This agricultural machinery is designed for tilling and soil preparation. It features a robust engine, adjustable tilling depth, and a durable frame.

Product Overview

Professional Soil Preparation

This walk-behind soil tiller is engineered for efficient soil preparation in small to medium-sized gardens and agricultural plots. It features a robust engine and durable frame, ensuring longevity and consistent performance during operation. The design prioritizes user comfort with an ergonomic handle and includes a front wheel to enhance maneuverability across various terrain types.

Technical Specifications

Machine Type	Walk-Behind Soil Tiller
Suitable Applications	Small Gardens, Medium Gardens, Agricultural Plots, Soil Preparation

Design & Features

Key Features

- Robust engine for high performance
- Adjustable tilling depth
- Durable frame construction
- Rotating blades for efficient soil turning
- Front wheel for maneuverability
- Ergonomic handle design
