

Walk-Behind Soil Tiller

This agricultural machinery is designed for tilling and soil preparation. It features a robust engine and durable tines for effective soil turning.

Product Overview

Professional Soil Preparation

This walk-behind soil tiller is engineered for efficient soil preparation in small to medium-sized farming operations. Its robust engine and durable tines ensure effective soil turning, while the adjustable handles prioritize operator comfort during extended use. The compact design makes it highly maneuverable, allowing for precise operation even in tight spaces.

Technical Specifications

Key Components

- Durable Tines
- Red Fuel Tank
- Beige Engine

Application	Small to medium-sized farming
Design Features	Compact, Adjustable Handles, Robust Engine
Safety Features	Yes
