

Walk-Behind String Trimmer

This walk-behind trimmer uses a high-speed rotating nylon rope for cutting. The steel front shield provides enhanced safety.

Overview

Professional Walk-Behind Trimmer

This high-performance walk-behind string trimmer is designed for demanding landscaping tasks, offering reliable operation for both residential and commercial applications. Engineered for maneuverability, it excels at trimming along fence lines, walls, and obstacles where standard mowers cannot reach. With an adjustable cutting height and a robust 5HP engine, it provides consistent results across varied terrain.

Technical Specifications

Maximum Power Output
