

Walk-Behind Tilling Machine

This walk-behind tilling machine is a robust agricultural tool for soil preparation and cultivation. Powered by a high-performance engine, it provides optimal tilling power and features adjustable depth and width for different applications.

Overview

Professional Soil Preparation Solution

The Walk-Behind Tilling Machine is a high-performance agricultural tool engineered for precision soil cultivation. It offers robust durability and consistent power, making it an ideal choice for both medium-sized farming operations and professional landscaping projects. Featuring adjustable operational parameters, it provides the versatility required for various soil types and crop preparation needs.

Key Performance

Operational Power

1 High

Engine Performance Class

Technical Versatility

Adjustable Settings

- Variable tilling depth
- Adjustable tilling width

Best For

Small-scale farming, Medium-scale farming, Landscaping, Garden cultivation

Design & Ergonomics

User Experience

- Ergonomic handle design
- Simplified operator controls
- Enhanced comfort during extended use
