

Walk Behind Trencher

This self-propelled trencher is suited for landscape contractors and homeowners with smaller trenching applications, such as sprinkler systems. A special pivot system keeps the pivot pushing out of the dirt.

Overview

Professional Walk Behind Trencher

This self-propelled walk-behind trencher is engineered for landscape contractors and homeowners seeking an efficient solution for small-scale trenching tasks. Equipped with a reliable gasoline engine and a specialized pivot system, it keeps debris away from the pivot point to ensure longevity. Designed for optimal maneuverability, this machine is ideal for installing sprinkler systems, cables, and drainage piping.

Technical Specifications

Model	WBTR126H
Engine	Honda GX160-5.5HP

Performance Metrics

Trench Dimensions

4 inch Trench Width	12 inch Trench Depth
-------------------------------	--------------------------------

Operating Speeds

Metric	Speed
Reverse Speed	58 fpm
Digging Chain Speed	336 fpm

Mechanical Design

Boom Travel Angle	5 degrees
