

Walk-Behind Vibratory Roller

This walk-behind roller is designed for compacting asphalt, granular materials, and soil. It is ideal for small to medium-sized compaction jobs such as driveways, sidewalks, and patching.

Product Overview

Professional Compaction Performance

This walk-behind vibratory roller is engineered for efficient compaction of asphalt, soil, and granular materials. Designed for versatility, it is an ideal solution for small to medium-sized projects, including driveways, sidewalks, and road patching. Built with a durable steel drum and a reliable diesel engine, it offers the robust performance required for demanding construction environments.

Technical Specifications

Dimensions (L x W x H)	2,550 x 700 x 1,250 mm
Total Weight	765 kg
Water Tank Capacity	60 L

Performance Metrics

Key Performance Metrics

13 kN Max Centrifugal Force	55 Hz Vibrating Frequency	40 % Max Gradeability
Max Traveling Speed	60 m/min	

Drum Specifications

Drum Dimensions

Specification	Value	Unit
Drum Length	650	mm
Drum Diameter	420	mm

Power System

Engine Type

Diesel

Engine Model	Lombardini 15LD440
Max Power Output	7.4 kW
