

Walk-Behind Vibratory Roller

The walk-behind vibratory roller is designed for compaction of soil, asphalt, and gravel. It features a robust engine for reliable power and a smooth drum for even compaction.

Product Overview

Professional Compaction Solution

This walk-behind vibratory roller is engineered for efficient compaction of soil, asphalt, and gravel surfaces. Designed for small to medium-sized construction projects, road repairs, and landscaping, it combines robust engine power with a smooth drum design to ensure consistent results. The unit features intuitive, user-friendly controls, making it an ideal choice for operators seeking reliability and ease of use on the job site.

Technical Specifications

Key Features

- Robust engine for reliable power
- Smooth drum for even compaction
- User-friendly control interface
- Walk-behind operation design

Model Identifier	XG600S1S
Suitable Applications	Soil Compaction, Asphalt Paving, Gravel Compaction, Road Repair, Landscaping
