

Walking Tractor for Agriculture

This is a versatile walking tractor designed for agricultural tasks. It features a robust diesel engine, providing reliable power for tilling, plowing, and other farming operations.

Overview

Versatile Agricultural Power

This walking tractor is engineered to provide reliable performance for a variety of essential agricultural tasks including tilling and plowing. Featuring a robust air-cooled diesel engine and high-traction lugged tires, it ensures consistent operation across diverse soil conditions. The machine is designed for comfort and precision, offering adjustable controls and a compact frame that excels in tight maneuverability.

Technical Specifications

Engine Type	Diesel
Cooling System	Air-cooled
Key Features	Adjustable Handlebars, Low-light Headlight, Durable Air Filtration

Performance

Primary Applications

- Tilling
- Plowing
