

# Walking Tractor with Anti-Skid Wheels

This walking tractor is designed for agricultural tasks and features anti-skid wheels to improve traction and stability on various terrains. It is equipped with a powerful engine for efficient operation and is suitable for plowing, tilling, and other soil preparation activities.

## Product Overview

### Robust Agricultural Solution

The walking tractor model 640-100N is engineered for high-performance agricultural tasks, including plowing and tilling. It features specialized anti-skid wheels that ensure superior traction and stability across various soil terrains. With an ergonomic design featuring adjustable controls, this tractor balances operator comfort with the heavy-duty power required for demanding field conditions.

## Product Details

Model Number	640-100N
