

Walking Tractor with Rotary Tiller

This walking tractor is designed for agricultural use. It features a robust engine, adjustable handles, and rotary tillers for effective soil cultivation.

Product Overview

Designed for Efficient Farming

This walking tractor is a specialized machine designed for robust agricultural use. It features a powerful engine, adjustable handles for operator comfort, and high-quality rotary tillers optimized for effective soil cultivation. The unit is built with a sturdy supporting frame and engine housing to ensure stability during demanding field operations.

Key Features

Equipment Features

- Robust engine for agricultural tasks
- Adjustable handles for ergonomic control
- Integrated rotary tillers for soil preparation
- Engine housing for protection
- Supporting frame for operational stability

Application

Primary Applications

Agricultural Use, Soil Cultivation, Field Preparation
