

Walking Tractor

This is a walking tractor designed for agricultural use. It can be configured with a variety of attachments such as seed drills, harvesters, sprinklers, trailers, and ploughs.

Overview

Versatile Agricultural Solution

This walking tractor system is designed to support a wide range of agricultural tasks through modular attachments. It provides a robust platform for planting, harvesting, and soil preparation. Built for efficiency and adaptability, this machinery helps streamline farm operations by offering interchangeable tools for diverse field requirements.

Attachments & Compatibility

Compatible Equipment

Equipment Name	Key Metric
2BG-6A Rotary Seed Drill	6 rows
4GL-130 Harvester	130cm cutting width
SY-80 Sprinkler	0.9m radius
7C-1.5 Trailer	1.5T capacity
ILS-220 Two-Share Plough	14-18cm depth
ILY-220Y Disc Plough	12-18cm depth

Performance Metrics

Harvester Performance

130 cm Cutting Width	9 km/h Productivity
--------------------------------	-------------------------------

Ploughing Efficiency

- Two-Share Ploughing Depth: 14-18 cm
- Disc Ploughing Depth: 12-18 cm
- Ploughing Width: 40 cm
