

Walkthrough Multi-Zone Metal Detector

This walkthrough metal detector is designed for security screening in critical sectors and public places. It features multi-zone detection to accurately pinpoint the location of metallic objects and minimize false alarms.

Overview

Professional Walkthrough Metal Detector

This multi-zone walkthrough metal detector is engineered for high-security environments, providing precise detection capabilities to identify metallic objects on individuals. Designed for reliability and durability, it features advanced signal processing to minimize false alarms while maintaining high throughput. The system is suitable for deployment in airports, schools, government buildings, and other sensitive locations requiring robust security screening.

Physical Specifications

Weight	65 kg
Overall Dimensions (H x W x D)	2190 x 850 x 550 mm
Channel Size (W x H)	720 x 2000 mm

Electrical Requirements

Power Source	95 ~ 250VAC, 50Hz (60Hz)
Power Consumption	55 VA

Key Features

Detection Capabilities	Multi-zone detection, Adjustable sensitivity, Advanced signal processing
