

Wall Hung Gas Boiler

This gas boiler features intelligent PCB control and advanced burning technology for high heating efficiency. It offers various protection measures, quiet operation, and a large display panel.

Overview

Professional Heating Solution

This wall-hung gas boiler provides a reliable, high-efficiency solution for residential heating and hot water demands. Designed with over 20 safety protection measures, it offers a versatile alternative to traditional central heating systems by allowing individual temperature control. With capacities ranging from 13kW to 99kW and support for both NG and LPG fuels, it is a powerful and environment-friendly choice for modern households.

Technical Specifications

Available Types

- Atmospheric
- Condensing

Compatible Fuels

Natural Gas (NG), Liquefied Petroleum Gas (LPG)

Safety & Compliance

Safety Measures

Overheat Protection • Automatic Shutoff • 20+ Protection Measures

Application

Primary Applications

- Space Heating
- Hot Water Supply
