

Wall Hung Gas Boiler

This wall hung gas boiler features intelligent PCB control for convenient usage and malfunction analysis. Advanced burning technology ensures high heating efficiency and reliable performance.

Product Overview

Professional Heating and Hot Water Solution

This wall hung gas boiler provides a reliable, high-efficiency solution for individual residential heating and domestic hot water needs. Featuring over 20 integrated safety protection measures, the system offers precise temperature control and flexible operation. Its compact design is suitable for both new building installations and retrofit projects, delivering superior performance compared to traditional central heating or electric water heaters.

Technical Specifications

Capacity Range

13 kW

Minimum Output

99 kW

Maximum Output

Available Designs

- Atmospheric Boiler
- Condensing Boiler

Heating Efficiency

97 %

Fuel Types

Natural Gas (NG), Liquefied Petroleum Gas (LPG)

Compliance and Safety

Safety Standards

20+ Protection Measures • Low Emission • High Efficiency
