Overview

Professional Wall-Mountable Network Cabinet

This high-reliability network equipment cabinet is engineered for secure and efficient hardware housing in space-constrained environments. Featuring a robust SPCC cold-rolled steel construction, it provides a substantial static load capacity of 800kg. The design includes a tempered glass front door for easy visual monitoring and modular panels that ensure quick installation and convenient maintenance.

Physical Properties

Static Load Capacity

Static Load

Material Specifications

Component	Thickness (mm)
Mounting Profile	2.0
Other Structural Components	1.2 - 1.5

Design and Build

Key Features

- Tempered glass front door
- Removable front, rear, and side panels
- Optional steel rear door
- Integrated ventilation in bottom panel
- Cable entry ports on top and bottom

Surface Finishing

Degreasing, Pickling, Phosphoric Treatment, Powder Coated

Installation

Mobility and Stability

Adjustable feet • Castors available
