

Wall-Mountable Reverse Osmosis Water Filter

This wall-mountable reverse osmosis water filter features a multi-stage filtration process to remove impurities from tap water. Its compact design includes a digital display and multiple dispensing options.

Product Overview

High-Efficiency Wall-Mountable RO System

The WQH-RO-B12 is a professional-grade wall-mountable reverse osmosis water filtration system designed for domestic efficiency. It effectively purifies tap water through an advanced filtration process to ensure safe, great-tasting water on demand. The compact design allows for easy installation while maintaining a high output capacity suitable for daily household requirements.

Technical Specifications

Performance Ratings

189 L/24h

Daily Filtration Capacity

0.13 ml/min

Feed Water Flow

Electrical Standards

- Voltage: 220V
- Frequency: 50Hz

Operational Environment

Operating Conditions

Parameter	Range
Ambient Temperature	4°C - 40°C
Water Temperature	5°C - 38°C
Water Pressure	0.1 - 0.1 MPa

Physical Dimensions

Package Size	430 x 235 x 530 mm
--------------	--------------------

Design

Color Options	Green, Silver, Blue
