

Wall-Mounted Air Conditioning Unit with Centrifugal Fan

This wall-mounted air conditioning unit is designed for residential or commercial use. It features a centrifugal fan for efficient air circulation and adjustable temperature settings.

Product Overview

Professional Air Circulation Solution

This wall-mounted unit features a specialized centrifugal aspirant fan designed for efficient air circulation in both residential and commercial settings. The robust design utilizes durable plastic materials to ensure long-term reliability and straightforward maintenance. Engineered for indoor climate management, it provides versatile cooling and heating functionality with adjustable settings to meet specific environmental requirements.

Technical Specifications

Fan Type	Centrifugal Aspirant Fan
Installation Style	Wall-mounted
Casing Material	Durable Plastic

Key Features

Core Features

- Centrifugal fan for enhanced efficiency
- Adjustable temperature settings
- Variable fan speed control
- Indoor installation capability

Application

Suitability	Residential, Commercial, Indoor Climate Control
-------------	---
