

Wall-Mounted Air Curtain Heater

This wall-mounted air curtain heater is designed for indoor spaces. It incorporates adjustable louvers to optimize heat distribution.

Overview

Efficient Heating Solution

The KPT-2000D is a wall-mounted air curtain heater engineered for efficient and targeted climate control in indoor spaces. Its sleek, low-profile metallic design allows for seamless integration into both commercial and residential environments. Featuring adjustable louvers for precise airflow direction and an intuitive control panel, this unit provides a reliable, cost-effective, and easy-to-maintain heating solution.
