

Wall-Mounted Ceramic PTC Heater with Adjustable Thermostat

This unit features a built-in ceramic element for enhanced safety. It has an adjustable thermostat offering three comfort settings and automatic overheat protection.

Product Overview

Efficiency Meets Comfort

This wall-mounted ceramic PTC heater is designed for versatile indoor and outdoor climate control. Featuring a self-regulating heating element, it ensures consistent warmth while maintaining high safety standards. Its integrated adjustable thermostat and three comfort settings allow users to precisely manage their environment, backed by reliable automatic overheat protection.
