

Wall-Mounted Electric Fan with Protective Grill

This wall-mounted electric fan provides air circulation and ventilation. It features a circular protective grill and a central motor housing.

Product Overview

Efficient Air Circulation

This wall-mounted electric fan is engineered for effective ventilation and consistent air circulation. Featuring a robust design with a protective grill, it combines safety with reliable performance. Ideal for household environments, this unit is constructed from a blend of metal and plastic components to ensure durability and ease of installation.

Technical Specifications

Fan Type

Wall-Mounted • Exhaust Fan

Materials

Metal, Plastic

Safety Features

Protective circular grill

Installation

Wall-mounted with support rods
