

Wall Mounted Gas Boiler

This wall mounted gas boiler features intelligent PCB control for ease of use and malfunction analysis. Its advanced burning technology ensures high heating efficiency and it includes multiple protection measures.

Product Overview

High-Efficiency Residential Heating

This wall-mounted gas boiler offers a reliable, long-proven solution for residential space heating and hot water requirements. It supports both natural gas (NG) and liquefied petroleum gas (LPG), delivering high thermal efficiency, with condensing models reaching up to 97%. With over 20 integrated safety protection measures, this unit provides a safe, customizable, and compact alternative to traditional central heating systems.

Technical Specifications

Power Output Range

13 kW

Minimum Capacity

99 kW

Maximum Capacity

Available Designs

- Atmospheric
- Condensing

Compatible Fuels

Natural Gas (NG), Liquefied Petroleum Gas (LPG)

Key Features

Safety and Protection

Overheat Protection • Flame Failure Detection • 20+ Protection Measures

Heating Efficiency

97 %
