

Wall Mounted Gas Boiler for Home Heating

This wall-mounted gas boiler features intelligent PCB control for user-friendly operation and malfunction analysis. Its advanced burning technology ensures high heating efficiency and incorporates various protection measures.

Product Overview

High-Efficiency Residential Heating

This wall-mounted gas boiler offers a reliable, compact solution for residential heating and hot water needs. Featuring over 20 safety protection measures, it ensures secure daily operation while supporting both natural gas and LPG fuel sources. Its high-efficiency design reaches up to 97% heating efficiency in condensing models, providing significant energy savings compared to traditional systems.

Performance Specifications

Capacity Range

13 kW

Minimum Power

99 kW

Maximum Power

Heating Efficiency

97 %

Available Types

Atmospheric, Condensing

System Components

Key Components

- Dual heat exchangers
- Exhaust fan and wind pressure switch
- Integrated water pump
- Expansion tank
- Three-way valve with automatic bypass
- Digital temperature and pressure sensors

Safety and Usage

Safety Compliance

Overheat Protection • Automatic Shut-off • Flame Detection • Safety Valve

Installation Details

Connection Interface

Connection Type	Identifier
Gas Inlet	G
Cold Water Inlet	E
Heating Water Inlet	R
Heating Water Outlet	M
Hot Water Outlet	U
