

Wall-Mounted Gas Boiler for Hot Water and Heating

This gas boiler provides domestic hot water and heating. It features a super high capacity with an LED display, is easy to control, and offers high efficiency.

Product Overview

High-Efficiency Residential Heating Solution

This wall-mounted gas boiler is designed for optimal performance in domestic hot water and heating applications. It features a compact, neat design that ensures energy efficiency and environmental protection through advanced combustion technology. The system integrates intelligent control via a large LED interface, offering precise temperature management to ensure comfort in larger residential spaces.

Technical Specifications

Input Capacity

- 31
- 34

Temperature Precision	1 Celsius
Exhaust Model	Forced

Design and Compatibility

Control Options

- Room thermostat connection
- Remote controller support

Key Features	Wall-mounted, Water Tube Structure, Low Pressure, Natural Circulation, LED Display, Thermostat Compatible
