

Wall Mounted Gas Boiler

This gas boiler features a compact design with a high loading quantity. It uses advanced burning technology for efficient heating and has multiple protection measures in place.

Product Overview

Professional Residential Heating Solution

This wall-mounted gas boiler offers a reliable and efficient alternative to traditional heating systems, drawing on over 40 years of proven technology. Designed for versatility, the unit supports both natural gas (NG) and liquefied petroleum gas (LPG) while providing simultaneous heating and domestic hot water. Its compact footprint and extensive safety suite make it an ideal choice for residential applications seeking high performance and individual temperature control.

Technical Specifications

Capacity Range

13 kW

Minimum Power

99 kW

Maximum Power

Peak Efficiency

97 %

Features & Safety

Safety Protections

- More than 20 built-in protection measures
- Overheat protection
- Flame failure detection

Compatible Fuels

Natural Gas (NG), Liquefied Petroleum Gas (LPG)

Product Variants

Available Technologies

Atmospheric • Condensing
