Product Overview

High-Performance Air Circulation

This wall-mounted high-velocity fan features a streamlined aluminum blade design that delivers large air volume with soft, consistent airflow. Engineered for durability and reliability, it utilizes a high-quality motor with a thermal protector, capable of 5000 hours of continuous operation. Its adjustable pitching angle and oscillation function ensure wide coverage, making it an ideal cooling solution for homes, offices, restaurants, and commercial spaces.

Technical Specifications

Motor Technology

- Cold-rolled silicon steel sheet construction
- Copper enameled wire for low energy loss
- Built-in re-settable thermal protector
- Low-noise ball bearings
- Less than 50K temperature rise design

Performance

5000 hours

Continuous Run Time

3 levels

Speed Settings

Design & Construction

Operational Features

- Oscillation function
- Adjustable air supply pitching angle
- Wall-mounted installation
- Adjustable stand height

Construction Materials

Aluminum Blades, Metal Gears, Chrome Finish, Heavy-duty Plastic Base

Applications

Recommended Usage

Residential • Office • Hospitality • Workshop • Warehouse
