Product Overview

Professional Wall-Mounted Water Dispensing Solution

This high-efficiency, wall-mounted water dispenser is designed to provide reliable hot and cold filtered water for professional environments. Constructed with durable SUS 304 stainless steel, it features advanced layered heating technology and a comprehensive digital display for precise temperature and water level management. Built with energy-saving modes and integrated leakage protection, this unit combines safety, efficiency, and industrial-grade reliability.

Technical Features

Construction Material	SUS 304 Stainless Steel
Dispensing Capabilities	Hot Water, Cold Water, Filtered
Safety Systems	Leakage Protection, Layered Heating, Timer Switch

Operational Metrics

Key Performance Indicators

100 °C

Maximum Temperature

Status Monitoring

- Low Water Level
- Mid Water Level
- Full Water Level
