

Wall-Mounted Ozone Air Disinfection Unit

This wall-mounted unit utilizes ozone for air disinfection. It features a stainless steel enclosure, digital display, and ventilation fan for distributing ozone.

Product Overview

Professional Ozone Air Disinfection

This wall-mounted ozone disinfection unit provides comprehensive air sterilization through an active, chemical-free process that converts ozone back into oxygen. Designed for unmanned environments, it offers versatile control options including remote and programmed operation. Built with a durable stainless steel enclosure and utilizing advanced quartz ozone technology, it ensures reliable performance for demanding sanitation needs.

Performance Metrics

Core Performance Metrics

7.5 g/h Ozone Concentration	120 m3 Disinfection Volume	800 m3/h Circulating Airflow	125 w Output Power
---------------------------------------	--------------------------------------	--	------------------------------

Purification Efficiency

Metric	Efficiency
COVID-19 Bactericidal	e99%
Pathogenic Bacterium	e99.9%
Natural Bacteria	e93%
PM2.5 Removal	e98%
Formaldehyde Purification	e96%

Technical Specifications

Dimensions & Physical

- Product Size: 320 x 200 x 680 mm
- Weight: 15 kg
- Material: Stainless Steel

Operating Features

Remote Control, Timer (0-240min), 3-Speed Adjustable, Power Failure Protection
