

Wall-Mounted Quartz Radiant Heater

This wall-mounted radiant heater is designed for indoor use. It features a quartz heating element for efficient heating and includes adjustable power settings and overheat protection.

Product Overview

Efficient Radiant Heating

This wall-mounted radiant heater utilizes advanced quartz heating elements to provide rapid and efficient warmth for indoor environments. Engineered for versatility, it is an ideal supplemental heating solution for areas such as bathrooms, workshops, or garages. The unit features durable, heat-resistant construction and includes all necessary mounting hardware for professional and easy installation.
