

Wall-Mounted Radiant Bathroom Heater

This wall-mounted heater provides rapid warmth in bathrooms and other small spaces. It features three radiant heat lamps, each controlled by an individual switch for adjustable heat output.

Product Overview

Efficient Radiant Heating Solution

This wall-mounted radiant bathroom heater is designed to provide rapid, targeted warmth in small spaces. Featuring three independently controlled radiant heat lamps, it allows users to customize the heat output to their comfort level. With a durable white plastic housing and silver trim, it combines functional heating performance with a clean, modern aesthetic suitable for bathroom environments.

Technical Specifications

Voltage	120 V
Frequency	60 Hz
Power Output	1500 W

Features & Safety

Control Method	Independent switches for each lamp
Safety Features	Overheat protection, Splash-resistant design

Installation

Installation Requirements

- Basic electrical knowledge required
- Adherence to local building codes recommended

Mounting	Wall-mounted
