

Wall-Mounted Split Air Conditioner

This air conditioner is a split system with both indoor and outdoor components. It provides cooling and heating for homes or businesses.

Product Overview

Efficient Climate Control Solution

This wall-mounted split air conditioner system provides a versatile solution for both residential and commercial cooling needs. The system consists of a sleek, modern indoor unit designed to blend into any interior decor and a durable outdoor compressor unit. With its included remote control, users can easily manage temperature settings to ensure a comfortable environment year-round.
