

Wall-Mounted Split Air Conditioning Unit

This high-efficiency wall-mounted split-type air conditioning unit is suitable for residential and commercial applications. It features quiet operation, a modern design, and an advanced filtration system, offering both cooling and heating modes with adjustable settings.

Overview

High-Efficiency Climate Control

This wall-mounted split-type air conditioning unit is designed to provide optimal comfort for both residential and commercial spaces. Featuring a sleek, modern aesthetic, it integrates seamlessly into any interior while delivering powerful heating and cooling performance. Advanced filtration technologies ensure superior indoor air quality, supported by energy-saving features and environmentally friendly refrigerant to reduce operational costs and environmental impact.

Performance

Key Performance Features

- Quiet operation technology
- Advanced air filtration system
- Adjustable fan speeds
- Variable temperature settings

Operating Modes

Cooling, Heating
