Product Overview

High-Efficiency Cooling & Heating Solution

This wall-mounted split-type air conditioner is engineered for both cooling and heating, making it a versatile choice for year-round climate control. Utilizing eco-friendly R410A refrigerant, the unit balances energy efficiency with powerful performance to maintain consistent indoor temperatures. Its sleek design and optimized power consumption make it an ideal solution for various residential and commercial environments.

Performance

Cooling Capacity

9000 BTU

Capacity

Electrical Characteristics

Parameter	Value
Power Input	710 W
Operating Current	3.1 A

Technical Details

Refrigerant	R410A
Key Features	High Efficiency, Split-Type Design, Dual Cooling & Heating
