

# Wall-Mounted Ultrafiltration Water Purifier

This wall-mounted water purifier measures 380x375x145mm. It features multiple filtration stages to remove impurities and improve water quality.

## Product Overview

### Advanced Ultrafiltration Technology

This wall-mounted water purifier is engineered to deliver clean, purified water on demand for residential applications. Utilizing a multi-stage filtration system, it effectively removes sediments and impurities while enhancing water quality through high-performance activated carbon and ultrafiltration membranes. Its compact, space-saving design ensures easy installation in any household environment.

## Technical Specifications

### Filtration Stages

- Sediment Filtration
- Activated Carbon Filtration
- Ultrafiltration Membrane

### Installation

Wall-mounted

## Key Features

### Primary Use

Residential • Household

### Design Highlights

Compact, Wall-Mounted, Visible Filter Array
