

Wall-Mounted Ventilation Fan for Air Extraction

This wall-mounted fan provides effective ventilation for various environments. It features a durable capacitor run induction motor and is easy to clean.

Product Overview

Professional Air Extraction Solution

This wall-mounted ventilation fan is engineered for efficient air extraction in residential and commercial spaces like kitchens and bathrooms. Built from durable plastic, it features a protective grille for safety and a compact form factor that simplifies installation in confined areas. The unit is designed to provide effective air circulation while maintaining a low noise profile, ensuring a comfortable environment.

Technical Specifications

Material	Durable Plastic
Mounting	Wall-mounted
Safety Features	Protective Grille, Blade Guard

Application Areas

Recommended Use

- Bathrooms
- Kitchens
- Small enclosed spaces
