

Wall-Mounted Ventilation Fan with Louvered Grill

This wall-mounted ventilation fan is designed for air extraction in residential or commercial spaces. It features a durable plastic housing with a louvered front grill for efficient airflow and protection against debris.

Product Overview

Professional Ventilation Solution

This wall-mounted ventilating fan is engineered for efficient air extraction in both residential and commercial environments. Featuring a robust plastic housing and a protective louvered grill, it ensures optimal airflow while preventing debris buildup. It is an ideal solution for kitchens, bathrooms, and other confined spaces requiring reliable air exchange and ease of maintenance.
