

Walnut Shell Abrasive Media

Natural walnut shells are suitable for abrasive and grinding applications. The media offers a unique texture and consistent size.

Product Overview

Natural Industrial Abrasive

Walnut shell abrasive media is a natural, biodegradable material derived from crushed walnut shells. It is widely utilized in industrial and crafting applications for its unique texture and cleaning properties. This medium provides effective results for surface preparation, grinding, and polishing without damaging the underlying substrate.

Material Characteristics

Environmental Profile

Biodegradable • Natural Material

Material Composition

Natural Walnut Shell

Primary Applications

Abrasive Blasting, Grinding, Surface Preparation, Polishing, Industrial Cleaning
