

Washing Machine Clutch XQB5-410TA

Washing machine clutch assembly designed for XQB5-410TA models. This mechanism facilitates smooth transitions between washing and spinning cycles, ensuring efficient and reliable operation.

Product Overview

Washing Machine Clutch XQB5-410TA

The XQB5-410TA clutch assembly is a precision-engineered component designed specifically for top-load washing machine models. This robust mechanism facilitates smooth, reliable transitions between washing and spinning cycles, ensuring consistent machine performance. Built from durable, corrosion-resistant materials, it offers enhanced longevity and optimal torque control for your laundry equipment.

Technical Specifications

Model Number	XQB5-410TA
Drive Type	Belt-driven pulley system
Key Features	Corrosion-resistant, Top-load compatible, High-torque control, Durable construction
Application	Top-load washing machines
