

Washing Machine Control Board

This control board manages the various functions of a washing machine. It is designed with electronic components to ensure compatibility and optimal performance.

Product Overview

High-Performance Appliance Control Solutions

These professional-grade control boards are precision-engineered to manage essential washing machine functions, including motor operation, precise water level sensing, and cycle timing. Each unit is constructed with high-quality electronic components like microcontrollers and relays mounted on a robust PCB for maximum reliability. Designed for seamless integration, these modules ensure optimal appliance performance and longevity in demanding environments.

Technical Specifications

Managed Functions

- Motor control
- Water level sensing
- Temperature regulation
- Cycle timing

Key PCB Components

- Microcontrollers
- Relays
- Capacitors
- Resistors
- Connectors

Compatible Model Series

HITACHI-11, HITACHI-12, HITACHI-13, HITACHI-14, HITACHI-15, HITACHI-16, HITACHI-17, HITACHI-18, HITACHI-19, HITACHI-20, HITACHI-21, HITACHI-22, HITACHI-23, HITACHI-24, HITACHI-25, HITACHI-26
