

Washing Machine Control Boards

These are control boards designed for washing machines. The boards feature electronic components that manage the operation of the washing machine.

Product Overview

Control Board Solutions for Washing and Drying Systems

These professional-grade control boards are precision-engineered to manage essential functions in modern washing and drying appliances. Each unit is equipped with high-quality electronic components, including integrated circuits, relays, and capacitors, to ensure reliable motor control and cycle timing. Designed for seamless integration, these boards provide accurate water level sensing and precise temperature regulation for optimal machine performance.

Technical Specifications

Supported Model IDs

- 43
- 44
- 45
- 46
- 47
- 48
- 49
- 50
- 51
- 52
- 53
- 54

- 58

Core Functions

Motor Control, Water Level Sensing, Temperature Regulation, Cycle Timing

Integrated Components

Capacitors, Resistors, Integrated Circuits, Relays, Connectors
