

Washing Machine Electronic Control Board

Electronic control board designed for washing machines. It manages motor control, water level sensing, temperature regulation, and cycle selection.

Product Overview

Precision Control Module

This high-performance electronic control board is engineered to manage essential functions in professional-grade washing machines. It provides reliable control over motor speed, water level sensing, temperature regulation, and cycle selection. Designed for durability, this module ensures optimal machine performance and consistent washing results.

Compatibility

Compatible Series

HITACHI-11, HITACHI-12, HITACHI-13, HITACHI-14, HITACHI-15, HITACHI-16, HITACHI-17, HITACHI-18, HITACHI-19, HITACHI-20, HITACHI-21, HITACHI-22, HITACHI-23, HITACHI-24, HITACHI-25, HITACHI-26

Technical Specifications

Integrated Components

- Integrated circuits
- Relays
- Capacitors
- Multi-interface connectors

Maintenance

Pre-Installation Inspection

- Inspect for physical damage
- Check for signs of corrosion
- Examine for burnt components
