

Washing Machine Gearbox

This replacement gearbox is designed for use in washing machines. It converts the motor's rotational energy into the oscillating motion required for washing and spinning.

Product Overview

Washing Machine Gearbox

This replacement gearbox is specifically designed for washing machine applications, serving as the critical component that converts motor energy into the oscillating motion needed for washing and spinning. Engineered with durable plastic and metal materials, it ensures longevity and reliable performance under demanding conditions. The unit features efficient power transmission and low-noise operation, making it an essential part for maintaining optimal washing machine functionality.

Technical Specifications

Speed Reduction Scale	1:5
Wave Wheel Spline Size	9x9x11.5
Inner Gear Modulus	0.9M

Performance Metrics

Suitable Clothes Weight

5 KG

Max Load Capacity

Product Features

Key Features	Efficient Power Transmission, Low Noise Operation, Wear Resistant, Durable Construction
