

Washing Machine Main Control Board

This is a replacement main control board for washing machines. The circuit board manages motor control, water level sensing, and user interface functions.

Product Overview

Professional Grade Washing Machine Control Board

This high-performance main control board is designed to regulate essential washing machine functions, including precision motor control and advanced water level sensing. Engineered for reliability, the assembly integrates robust electronic components such as microcontrollers, capacitors, and resistors to ensure stable operation. These units provide a comprehensive solution for professional maintenance and repair services seeking compatible hardware.

Compatibility and Identification

Compatible Model Series

HITACHI-27, HITACHI-28, HITACHI-29, HITACHI-30, HITACHI-31, HITACHI-32, HITACHI-33, HITACHI-34, HITACHI-35, HITACHI-36, HITACHI-37, HITACHI-38, HITACHI-39, HITACHI-40, HITACHI-41, HITACHI-42

Technical Features

Integrated Components

- Microcontrollers
- Capacitors
- Resistors
- System Connectors

Primary Control Functions

- Motor control management
- Water level sensing
- User interface integration
