

Washing Machine Motor 120W

High-performance 120W motor designed for washing machines. It features a 12-56.5shaft configuration.

Product Overview

High-Performance Washing Machine Drive System

This 120W motor is engineered to provide efficient and reliable operation for a variety of residential and commercial washing machinery. Featuring a specialized 12-56.5shaft configuration, it ensures compatibility with numerous machine models. Its durable construction is designed for longevity, providing consistent performance throughout the appliance's service life.

Technical Specifications

Rated Power

120 W

Power Output

Shaft Configuration

12-56.5

Application & Compatibility

Suitable Applications

Washing Machines, Drying Machinery
